

Concord Municipal Light Plant

High
Efficiency
Lighting
Program

Save money with high efficiency lighting

Concord Light's rebates can help you replace older, inefficient lighting that drives up your electric bill.

Rebates average 30% of lighting installation costs.

We make it easy

Choose our turnkey installation option for your lighting upgrade, and one of Concord Light's recommended vendors can handle all the details.

At no cost to you, a recommended vendor will:

- ✓ Assess your existing lighting
- ✓ Prepare customized specifications for high efficiency lighting and controls, including LED options
- ✓ Prepare an installation price quote and electricity cost savings estimate

If you decide to move forward, the vendor will:

- ✓ Complete the rebate paperwork for you
- ✓ Install high efficiency lighting/controls at the price quoted

Our program is flexible

If you wish, feel free to use your own vendor for the lighting assessment, quote and installation. You are not required to use a Concord Light recommended vendor to receive a rebate.
