

**CONCORD MUNICIPAL LIGHT PLANT
ELECTRIC RATE SCHEDULES**

RESIDENTIAL SERVICE RIDER– NET METERING WITH BANKING RATE

Mass DPU No. 472

Effective: January 1, 2023

Replaces Mass DPU No 460

The Concord Municipal Light Plant (the "**CMLP**") shall pay for energy delivered to the CMLP system from eligible, small scale generating sources including: solar, wind, and micro-turbine units which simultaneously generate electricity and recover heat.

Availability

This rate schedule is available throughout the entire territory served by the CMLP Electric System (the "**CMLP System**").

Applicability

This rate schedule is applicable to all small-scale generation facilities with a net output of less than one hundred sixty seven (167) kilowatts of alternating current capacity as determined by CMLP.

This rate rider is only available for residential service.

Rates and Credits

Energy delivered by the Customer to CMLP under this rate will be netted against the energy normally purchased under the R-1 Residential Service Rate from CMLP during the monthly billing period to the extent the delivered energy does not exceed Customer purchases from CMLP. To the extent the delivered energy exceeds the above purchases from CMLP during the billing period; CMLP will credit the Customer as follows: The credit for excess energy shall be determined by the avoided average monthly Real Time locational marginal price (RT-LMP) per kilowatt-hour applicable to Concord for wholesale power purchased from the ISO – New England. The Real Time price may vary with the source of customer generation at the discretion of CMLP. For example, the Real Time price for solar generation will be determined by calculating the average hourly RT price for the calendar month prior to the billing date based on the daytime hours between 9am and 4pm.
