## **CPA FUNDED PROJECT STATUS REPORT**

Project Name: Old Calf Pasture Habitat Restoration Project Number: #11-18

**1. What percentage of the project has been completed?** 100%

**2. Describe work completed to date:**

Ongoing work continues as part of a multi-year effort that began in 2010 and progress is steadily being made to improve the habitat for the rare violet and other native species. The Old Calf Pasture is one of the largest known population of the rare Britton's violet in New England, and invasive glossy buckthorn was threatening its continued presence at the meadow. Restoration is occurring through reduction and control of, primarily, glossy buckthorn, along with a few other invasives. Work since 2010 includes mapping and treating areas of invasive species control, and a comprehensive Britton's violet survey indicating that numbers are being restored to prior counts.

**3. What key project milestones have been reached?**

Ongoing success at controlling invasives and restoring suitable habitat for the rare Britton's violet, along with a count to monitor success.

**4. Expenditure Report:**

**a. What is the date your project began or will begin spending CPA funds?** 11/2019

**b. Briefly account for the amount of CPA funds expended to date:**

CPA funds contributed to the invasives control and mapping efforts.

**5. Describe remaining work and projected timeline:**

N/A

**6. What is the expected project completion date?** N/A

Name of person who completed this form: Delia Kaye Date: 8/18/20
