

Did you know that CMLP is planning to replace all of its electrical meters in 2022-2023? Article 26 in 2017 authorized borrowing for new meters with the goal of increasing reliability, accelerating storm response, and offering customer more choice, control and convenience in how they use energy.

You can read more about the expected new metering and communication system benefits by going to: <https://concordma.gov/2904/2021-Advanced-Metering-System>.

**Join the conversation
at a stakeholders meeting on**

**Wednesday, September 22nd
from 7:00 PM – 8:00 PM.**
